

## The Advanced Humidity and Temperature Solution That Optimizes Your Environment and Saves Costs

### Benefits of Humidity and Temperature Monitoring

#### Protect Your Property

VivoPoint Humidity/Temp Solution detects humidity and temperature to help protect buildings and assets against mold, damage and incidents.

#### Avoid Damage

VivoPoint Humidity Temp Solution and the VivoPoint platform are for facilities that want to protect facilities from mold and avoid damage to key facilities assets.

#### Stay Informed

When VivoPoint humidity solution detects temperatures or relative humidity that is outside of customizable thresholds, the VivoPoint platform sends a text, email to the user to notify them of the event and allow them to rectify the issue.

## VivoPoint Humidity/Temp Solution

COMMERCIAL  
INDOOR/OUTDOOR

COMMERCIAL WITH  
EXTENSION

GENERAL INDOOR

Commercial sensor available with extension sensor for remote applications. General Sensor for regulated indoor applications only.

## How It Works

01

A wireless cellular gateway is installed at the property to capture data from the sensors.

02

Wireless sensors are installed on to capture data.

03

Data is then displayed in our platform to allow for instant review and to create benchmarks.

## Applications

Indoor Pools

Indoor Spas

Server Rooms

Mechanical  
Rooms

Kitchens

Laundry
